Alpine Road West Service Drive Reconstruction Construction Update #5A September 16, 2015

Thursday, September 17th

As a reminder, curb and gutter is scheduled to be poured on the west side of the Service Drive on Thursday, September 17th. If you need access to your vehicle, please plan to have it out of the driveway and parked along the east side of the Service Drive or along one of the side streets by 7:00 AM on Thursday, September 17th. It typically takes 2-4 days for the concrete to cure to a sufficient strength to support traffic, so you will not have vehicular access to your driveways during the cure time. The Contractor will backfill a small portion of the driveway (typically 3-4 feet wide) the day after the pour in order to make it easier to walk over the curbing until it can be driven upon. We will begin testing the concrete for strength the day after it poured in an effort to get you back into your driveways as quickly as possible.

Construction of the curb and gutter is one of the more challenging times of the construction as parking and working space will be limited.

Thank you for your continued patience.

***Driving for a better
Machesney Park***
