

### **IL 173-Alpine Road to Perryville Road**

Rain is in the forecast Monday through Wednesday, which may hinder the activities planned for the week. Weather permitting, crews will be on site Monday and Wednesday to continue the crack filling along IL 173 between Alpine and Perryville Roads. The crack filling will take place as a "moving operation", meaning that lane closures will be in place only in the immediate work area.

### **IL 173-East of Perryville**

Weather permitting, crews will also continue to landscape on the north side of IL 173 east of Mitchell Road. Crews will also continue working on the center medians, as well as finishing a small amount of concrete paving work. There will be changes in traffic control as the Contractor completes its work, so please pay extra attention and slow down when driving within the construction zone.

### **Forest Hills and Perryville Roads**

Traffic control will remain in place in certain turn lanes of Perryville Road and Forest Hills Roads throughout the week.

### **Looking Ahead.....**

The Holiday Shopping season is fast approaching! We are very pleased to advise that IL 173 west of Perryville Road will be fully open by Thanksgiving, and the traffic control on Forest Hills Road and Perryville Roads will also be removed by the Thanksgiving Holiday.
