

BUILD MACHESNEY

A Blueprint for the Future

Kingsley & Drexel Improvements Construction Update #11 September 7, 2016

- The Contractor plans to pour curb and gutter on the south side of Drexel between Elkhorn and Elm Streets on Thursday, September 8th beginning at 7:00 A.M., weather permitting
- We ask that you please have your vehicle out of your driveway by 7:00 A.M the day of the pour. It typically takes 2-4 days for the concrete to cure to a sufficient strength to support traffic, so you will not have vehicular access to your driveways during that time. You will need to park on the opposite side of the road if you need access to your vehicle while the curb is curing. Parking and working space will be tight during the curb and gutter construction, and you might want to check to see if your neighbors on the opposite side of the street will allow you to park in their driveways. You will have the chance to return the favor when the curb construction shifts to the opposite side of the street. As a reminder, the Contractor will backfill a small portion (3-4 feet wide) of the new curb the day after it is poured to make it easier to walk over. They will backfill the remainder of the curb once it has cured to sufficient strength to support traffic. The contractor will be prepping the stone for the curb and gutter early in the week, and again, your driveway approach will be **much steeper** until the new curbing is in place.
- The Contractor may pour curb and gutter back in the 600 Block of Drexel. If this work occurs and the pour will affect access to your home, the Contractor will notify you a day ahead of the pour.

If you have any comments or questions feel free to contact:
